

Remove moisture & clean air

» **Airmovers**
circulate and evaporate water
into the air

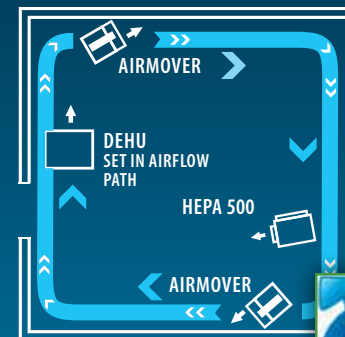

» **Dehumidifiers**
remove moisture from the air

» **Air Scrubbers**
help take hazardous particles
out of the air

Moisture and humidity can create problems with mold and mildew, musty odors, indoor air quality, even discomfort to occupants and damage to your facility. Professional-trusted Dri-Eaz equipment can get the wet out before these issues settle in.

You can also use Dri-Eaz equipment to provide cleaner air during construction or remodeling.

DRYING SET-UP

Set the airmovers to create a circular airflow pattern. Add the HEPA 500 if airborne contaminants are present.

For areas larger than 300 sq. ft., use additional airmovers and dehumidification.

STEPS

1. Locate and stop source of water intrusion
2. Remove as much standing water as possible
3. Contain the area by closing doors and windows
4. Position multiple airmovers along wet walls and set up at least one commercial dehumidifier in the space
5. Clean, disinfect and deodorize with Microban products

More Professional Solutions

Industrial portable dehumidifier gets the wet out

Remove up to 21 gallons/day of moisture from the air to dry spaces fast

LGR 3500i Dehumidifier
F411

CAPACITY 170 PINTS
DIMENSIONS 40.5"H x 23"W x 24"D
WEIGHT 160 LB
AMPS 10 AMPS

The professionals' choice for targeted airflow to speed evaporation and drying

Combine high airflow with dehumidification for efficient drying

Sahara Pro X3 TurboDryer*
F351

POWER 4 AMPS
MOTOR .33 HP
SPEEDS 3-SPEED
CFM 2071 FT/MIN

Reduce slip and fall hazards at entry doors from outside to inside

Dries wet floors in minutes! Doubles as a high speed carpet or floor dryer after cleaning

Airpath
F377

POWER 7.0 AMPS
MOTOR 1.0 HP
SPEEDS 2-SPEED

For **installed dehumidification**, use the **CMC100**

High performance, easy installation

CMC100
F391

CAPACITY 70 PINTS
DIMENSIONS 14.2"H x 10"W x 24"D
WEIGHT 55 LB
AMPS 5.3 AMPS

Cleaner air to breathe

Remove harmful organisms, allergens and construction dust from the air. Hospital-grade air filtration and odor control with optional filters

DIMENSIONS 24.6"H x 26.2"W x 18.2"D
CFM RATING MIN- 250 CFM | MAX- 500 CFM
FILTER SYSTEM 2-STAGE WITH OPTIONAL CARBON AND DOP FILTERS
PRIMARY FILTER HEPA FILTRATION TECHNOLOGY

HEPA 500
F284

Ace
F259

POWER 1.5 AMPS
MOTOR .25 HP
SPEEDS 2-SPEED
CFM 1881 FT/MIN

Ventilate

Ace for low pressure ventilation using just 1.5 amps

Vortex for moving high volumes of air up to 125 ft.

Vortex
F174-BLU

POWER 7.4 AMPS
MOTOR 1.0 HP
SPEEDS 1-SPEED

CLEAN THE AIR quickly and effectively!

Air filtration is filtering (scrubbing) the air so it's cleaner to breathe. Air scrubbers like the Dri-Eaz HEPA 500 can also be used as a negative air machine to clean air from a contained space. When occupants are in areas where air quality may be an issue, play it safe and run a HEPA 500 air scrubber with the filter options that fit your needs.

HEPA 500 AIR SCRUBBER

F284

Primary HEPA Filter

F321

HEPA filter media efficiency rating of 99.97% against 0.3-micron oily aerosol particles provides highly effective filtration. Unit's filter change indicator light alerts you to change the HEPA filter.

Prefilter

F271

Sturdy, high capacity filter effectively captures airborne particles and protects the longevity of HEPA filters.

Activated Carbon Filter

F397

Extruded activated carbon captures a wide variety of volatile organic compounds (VOCs), including smoke, food odors, fumes from paint and paint thinners, and many other undesirable odors or fumes.

Use Microban products for:

- » Infection control, including HIV, H1N1, MRSA
- » Lingering, persistent odors
- » Bed bugs, mites and other nuisance pests in guest rooms
- » Inhibit the growth of mold and mildew
- » One-step product to clean, disinfect and deodorize

Team Dri-Eaz and Microban products

- » CONTROL MOISTURE
- » CLEAN AIR
- » DRY FAST
- » DISINFECT SURFACES

Use them in:

- » Airports, casinos and restaurants
- » Light industrial, food processing and other manufacturing
- » Hotels in public areas and guest rooms
- » Universities and schools
- » Hospitals and other healthcare settings
